This Group Learning program has been certified by the College of Family Physicians of Canada and the Ontario Chapter for up to 1.00 Mainpro+ credits

YOUR SYMPOSIUM INVITATION

FRIDAY OCTOBER 29, 2021—VIRTUAL PLATFORM

1:45 pm—2:45 pm

REVERSE ENGINEERING

Presenter:

Peter J. Lin, MD, CCFP

Dr. Peter Lin is the Director of Primary Care Initiatives at the Canadian Heart Research Centre. He has a busy family practice in Toronto, Canada. He is also a contributing author to the Canadian Diabetes Guidelines 2013 and 2018 on the vascular protection section. He is also Associate Editor for the Elsevier WebPortal - PracticeUpdate Primary Care. Dr. Lin is also the health columnist for CBC and has been actively tracking the COVID-19 Pandemic since the beginning.

Symposium Outline:

Typically, medical education programs involve reviewing a patient case, then determining what treatment plan would be best and why. This program does the reverse. A treatment plan is shown, and participants are asked to infer, based on the medications and actions being prescribed, what kind of patient(s) the plan might apply to.

Symposium Objectives:

At the end of the symposium participants will be better able to:

1. Determine individualized treatment options that optimize glycemic control.
2. Offer CV and renal protection in patients with type 2 diabetes.
3. Identify and manage CV risk factors in patients with type 2 diabetes.
4. Screen appropriately for complications related to type 2 diabetes.

**All conference attendees registered for October 29, 2021 are welcome.
Participants will log into the Conference portal to attend the symposium beginning at 1:45 pm**
