

April 2023

In the wake of the 2023 budget, the Minister of Long Term Care, the Honourable Paul Calandra has been touring the province and visiting LTC sites.

The OLTC team continues to work at Government stakeholder tables and sub tables, as well as direct engagement of Government officials to provide direct input to discussions around measures to improve quality of care in LTC homes. Specifically, this last month, OLTC is watching and contributing to the discussion on administration of prescription drugs to residents by varying personnel.

The Legislature will rise in early June for the summer but work with committee and advisory tables will continue.
